Trip-Jio
Vehicle-Load availability

Connecting – Manufacturer/Customer with Vehicle owner/provider

Reducing Truck Waiting Time
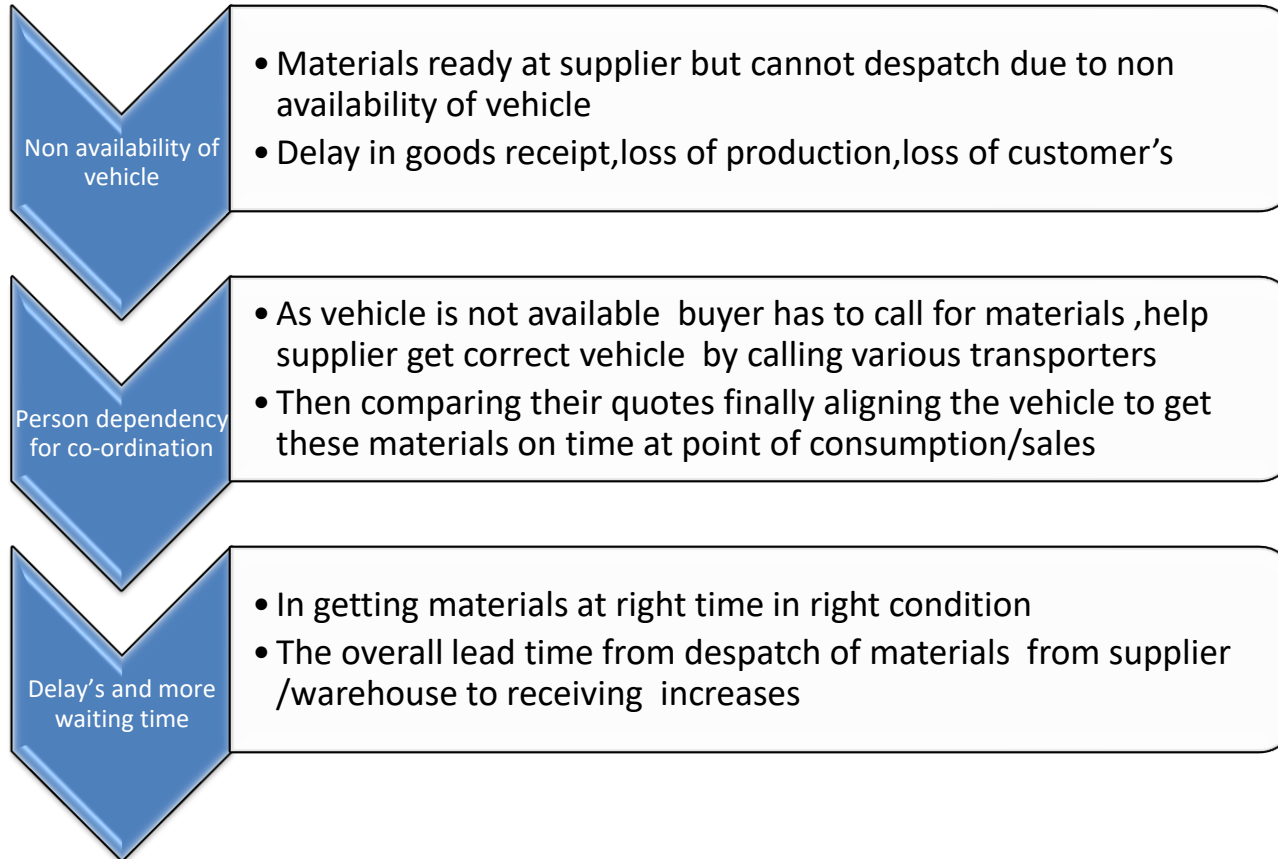

Quick Pick up of Loads of Customers

Logistics Challenges and Our Solution through App

Load/Goods   Vehicle/Fleet

Challenges in Inbound Logistics

Our Solution

Non availability of vehicle
- Materials ready at supplier but cannot despatch due to non availability of vehicle
- Delay in goods receipt,loss of production,loss of customer's

App Provides vehicle availability

Person dependency for co-ordination
- As vehicle is not available buyer has to call for materials ,help supplier get correct vehicle by calling various transporters
- Then comparing their quotes finally aligning the vehicle to get these materials on time at point of consumption/sales

App helps locate vehicle

Delay's and more waiting time
- In getting materials at right time in right condition
- The overall lead time from despatch of materials from supplier /warehouse to receiving increases

No delay both supplier and customer are connected real-time

Logistics Challenges –Outbound Logistics

Load/Goods   Vehicle/Fleet
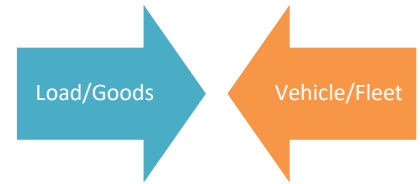

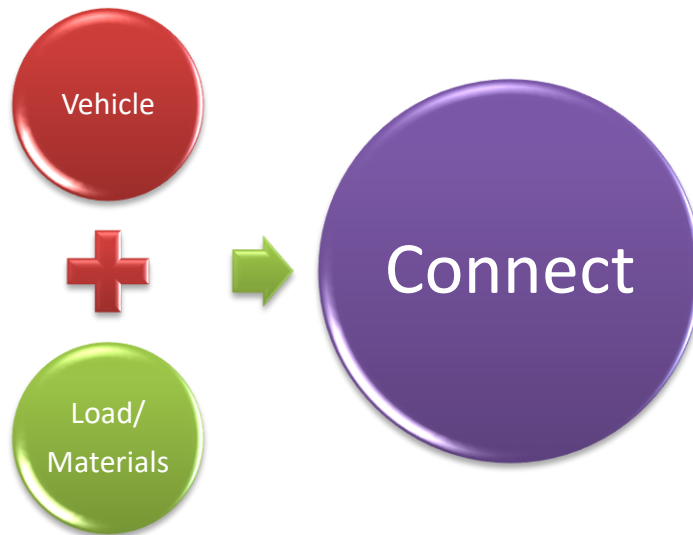

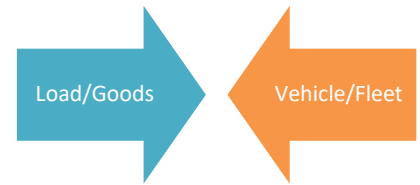

Finished Goods are ready but vehicle not available

Person dependency to call for vehicle

Regular transporter might not have vehicle availability

Increase in waiting time for correct vehicle at correct time

Dependency on regular transporter might delay and reduces opportunity to save costs
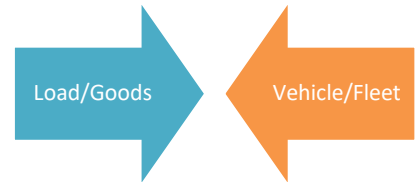

Our Solution   Load – Vehicle Connect

Load/Goods → ← Vehicle/Fleet

Vehicle

+

Load/Materials

→ **Connect**

Visibility

Despatch

Materials

Vehicle

We connect vehicle's /vehicle owners with manufacturer's /Warehouse despatcher

Advantages ,Benefits of App

Load/Goods → ← Vehicle/Fleet

Real Time Availability of vehicle

No delay or followup

No dependency on anyone

Quick Connect and Transparency in booking vehicle

Pre-requisites

- Vehicles having Android mobile phone with GPS activated and App downloaded
- Truck is available empty to pick load
- Customer having load to be picked
